

**SERRANO WATER DISTRICT
DIRECTOR, DIVISION 3**

DANIELLE G. KAVANAGH

OCCUPATION: Retired Radiation Safety Physicist

I have lived Villa Park since 1985. I am married and have one child in college. Employed 22 years by St. Joseph-CHOC Hospitals as Radiation Safety Officer and Director of Nuclear Medicine, developing and administering policies, advising and reporting to Local, State and Federal Nuclear Regulatory Agencies. Held board positions in professional organizations, written and presented medical and technical papers and was twice the only non-physician bestowed the "Values in Action Award" in the area of "Commitment to Excellence" by the St. Joseph Health System.

Since retiring, I've been active in Assistance League of Orange and Las Campanas. I wish to extend my community service and bring a new face, with new ideas, to our water district. My background in medicine and radiation safety makes me uniquely qualified in today's climate to respect and protect the quality and safety of our water supply.

Water can no longer be considered an infinite resource. As the first woman on the board, I will voice your concerns, be vigilant to maintain conservation and protection of the quality of our water, insure its efficient use in a cost effective manner, and focus on building an infrastructure to benefit present and future generations.
